

The most intensive interviewing skills training ever

As the war on talent intensifies and the skilled talent pool shrinks, how do you ensure you are hiring right? In this intense and highly interactive workshop, learn about cognitive biases, the 5Ws, and the BEI approaches to interviewing, and the whole process from planning to calibration.

You will also get checklists and job-aids to assist you while interviewing. Also, participate in a gamified interviewing simulation and pit your interviewing skills against other participants.

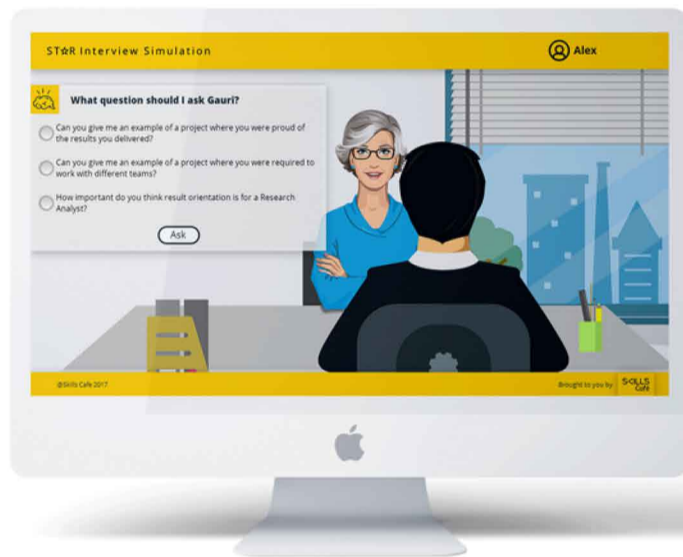

Topics covered

- Impact of cognitive biases on interviews
- Deep dive into the behavioural event interview technique
- Practice the 5Ws approach for technical interviewing
- Interview best practice from preparing to calibration

Practice and mastery through simulation

The online simulations offer a closed-loop, feedback-driven environment to practice and master interviewing skills. It comprises of 3-4 simulated interviews and a personalized mastery scorecard to pin point their areas of strength and improvement.

 **Time**
45 minutes

Simulation features
